**Attachments:** Reyes\_SOT\_abstract\_stics final.docx

I have attached the SOT poster abstract of the work that is the focus of the manuscript—I thought it might help guide your recommendation on which program offices we should provide a draft copy of the manuscript.

Hi Tina,

Congratulations on your new position as HHRA NPD! I look forward to working with you again as the NERL HHRA MI ☺

I wanted to check-in with you regarding a NERL (Paul Price) HHRA FY17 Q3 APR, “Applying the maximum cumulative ratio methodology to phthalate biomonitoring data from the National Health and Nutrition Examination Survey.” Jennifer Richmond-Bryant is the HHRA PL 6.4.1 (RMS HHRA 3.234.1). The manuscript that will comprise the product has been flagged for “advanced notification” and is close to being ready to be cleared through STICS. NERL would like to provide a copy to you and POs as both a courtesy and opportunity to provide comments; I would appreciate your thoughts on who you think should be included in the distribution. I will provide you with a copy of the abstract and manuscript as soon as they are completed.

Thanks.

John
